

RED-III OBLIGATION TO IMPLEMENT MASS BALANCE

13.01.2026

Lumbar OÜ has committed to implementing and complying with the requirements applicable to biomass production under Directive (EU) 2023/2413 of the European Parliament and of the Council (RED III) and the Sustainable Biomass Program (SBP) standards.

Lumbar OÜ understands that mass balance principles are critical for meeting and verifying the sustainability requirements for biomass arising from RED III. Therefore, the company has established a management system to ensure the consistent implementation and effective performance of these principles.

The management system includes training for employees, cooperation with suppliers, and regular internal and external audits.

Lumbar OÜ aims to ensure that the biomass produced by the company complies with the applicable RED III sustainability requirements and SBP standards, and that all relevant activities and processes are documented and auditable.
